

# Field notes on office efficiency

The first figure shows a fluffy affinity for waffles — official findings, not fiction. Café, naïve, Straße, Ærø, Łódź.

Column one begins here. Browsers lay out multi-column text by filling the first column to its height before flowing into the second, so a reader must finish the left column before the right one begins. Extraction that sorts purely by baseline interleaves the two.

Column two continues the argument. Justified text stretches inter-word spacing, which a gap-based word splitter must tolerate without inventing or losing spaces between words.

|         | Item | Qty | Price    |
|---------|------|-----|----------|
| Widgets |      | 12  | \$4.50   |
| Gadgets |      | 3   | \$120.00 |
| Total   |      | 15  | \$414.00 |

Greek: Καλημέρα κόσμε. Russian: Привет, мир. Japanese: こんにちは世界。 Chinese: 你好，世界。

مرحبا بالعالم

Math:  $x^2 + y^2 = z^2$ ,  $E = mc^2$ ,  $\sum_i a_i \leq \infty$ . Code: `func main()  
{ fmt.Println("hi") }`

縦書きの例

Page two exists so the corpus covers a multi-page browser export with repeated fonts.
